PSLV-CA

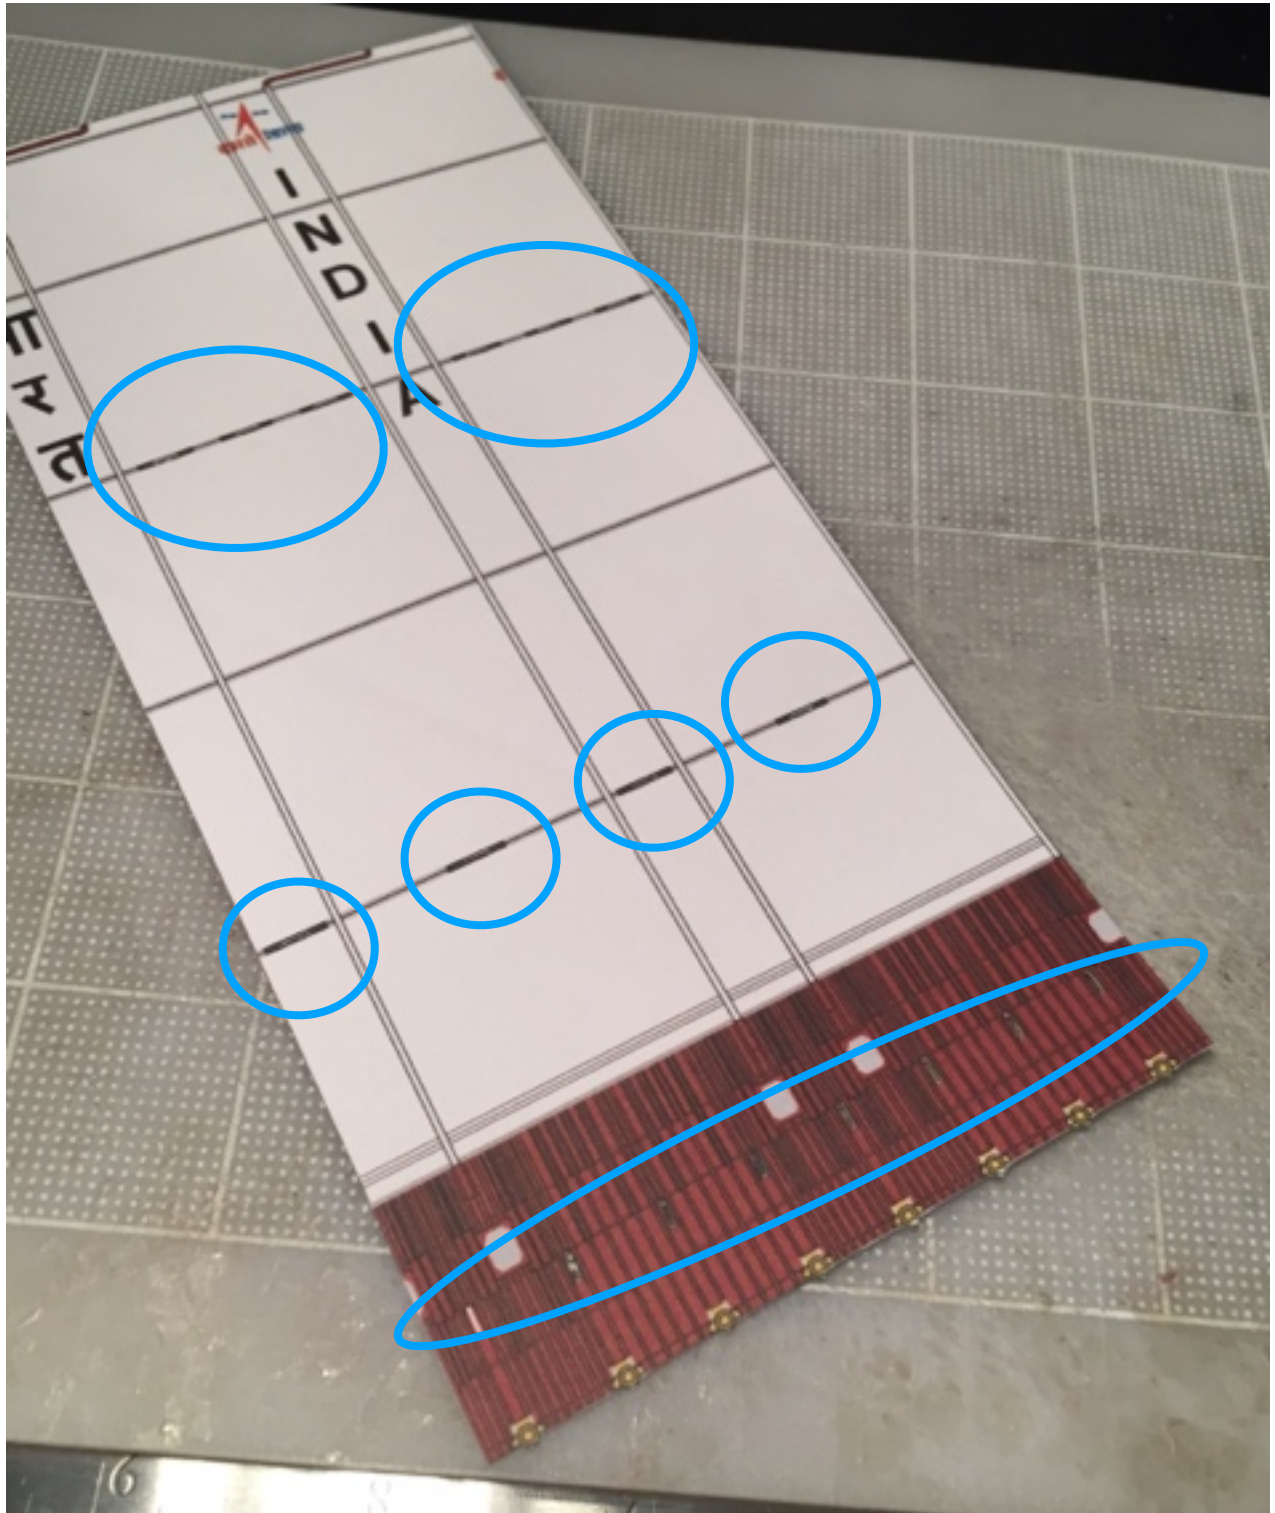

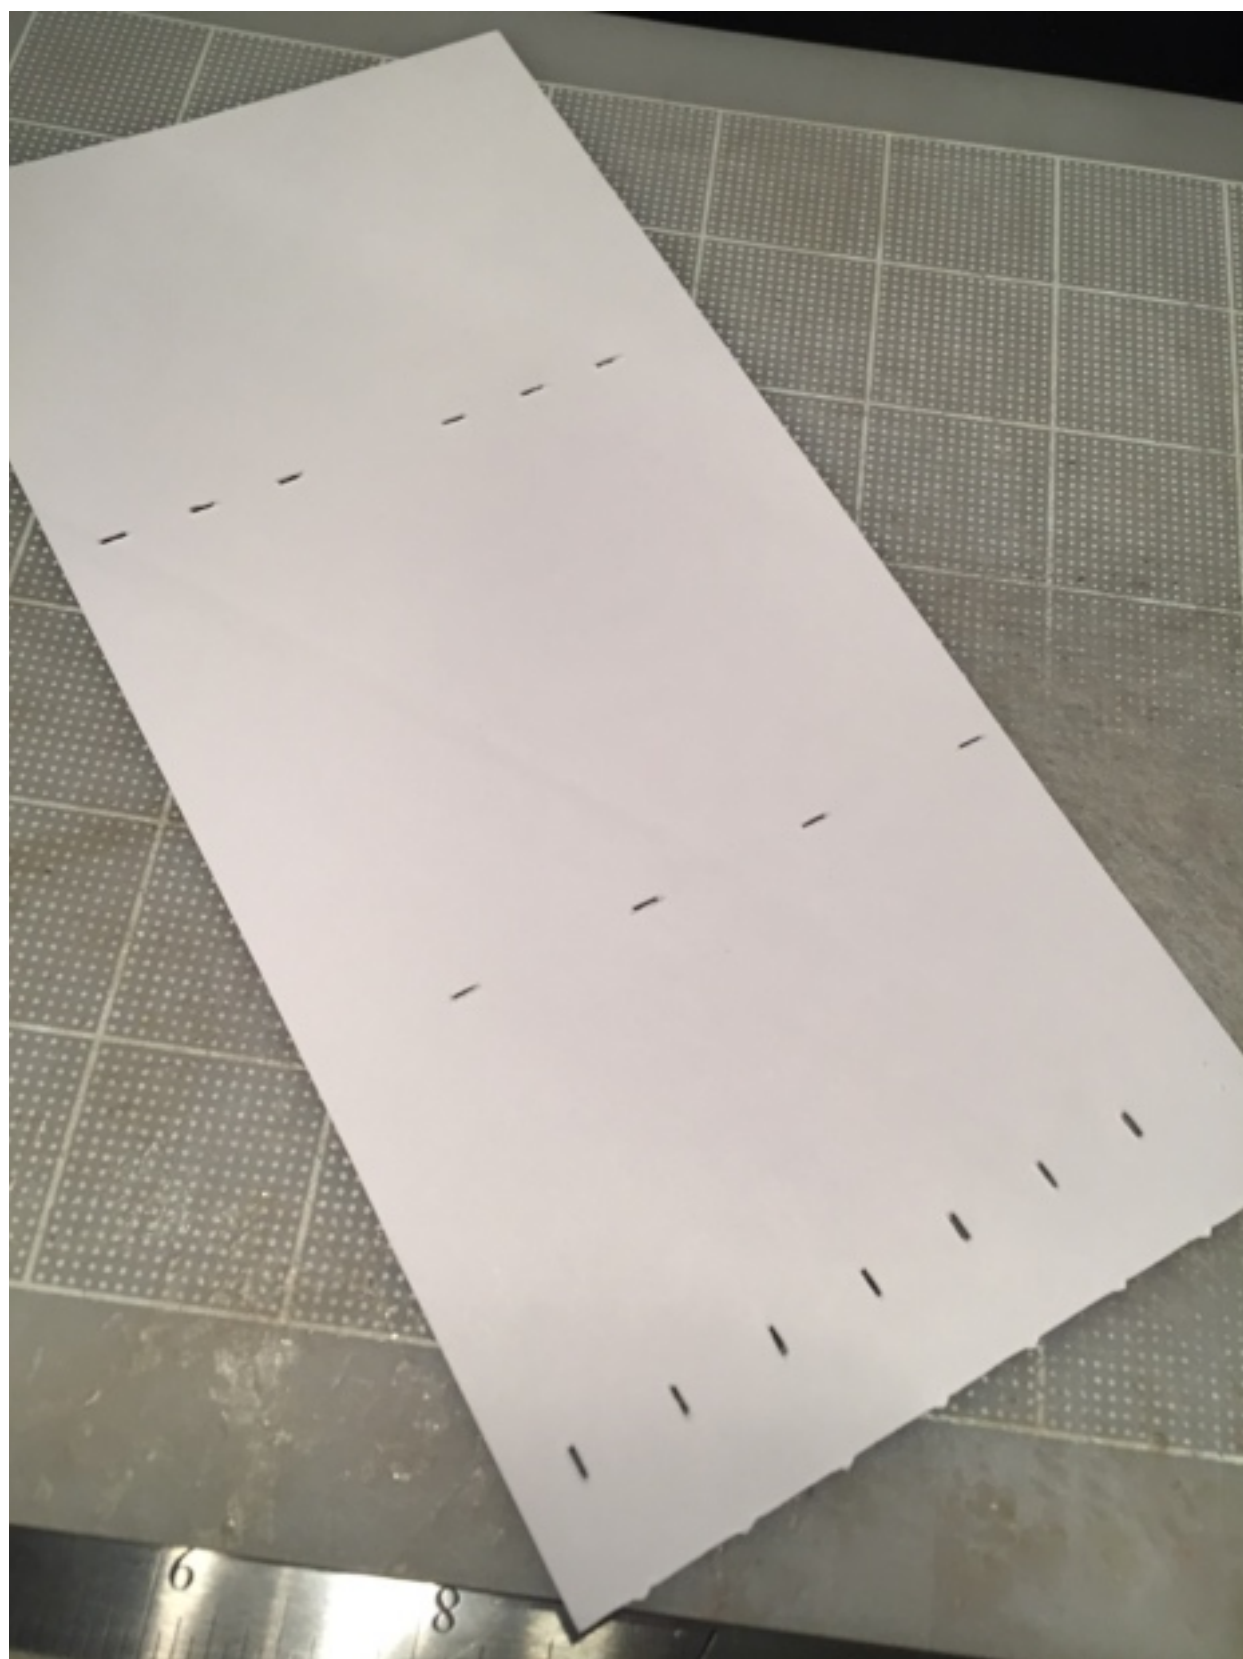

PSLV-G

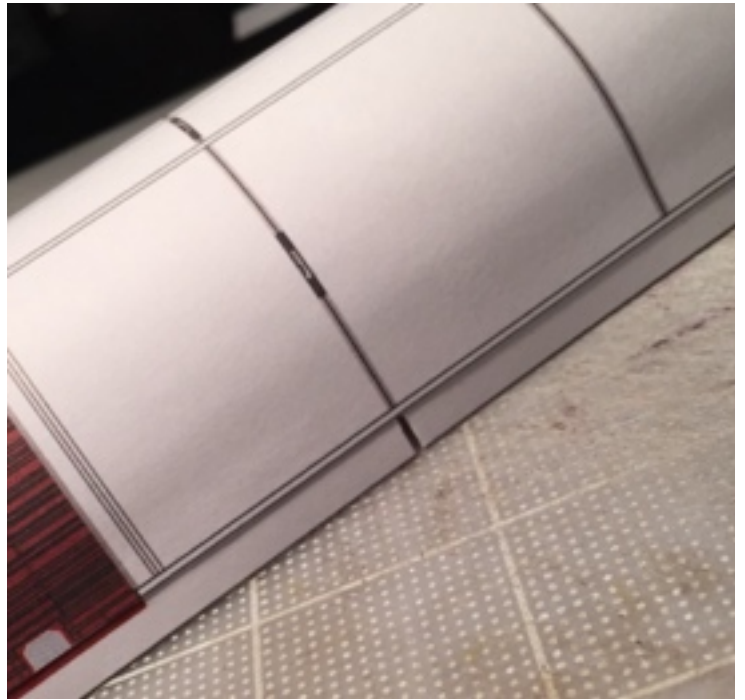

PSLV-XL

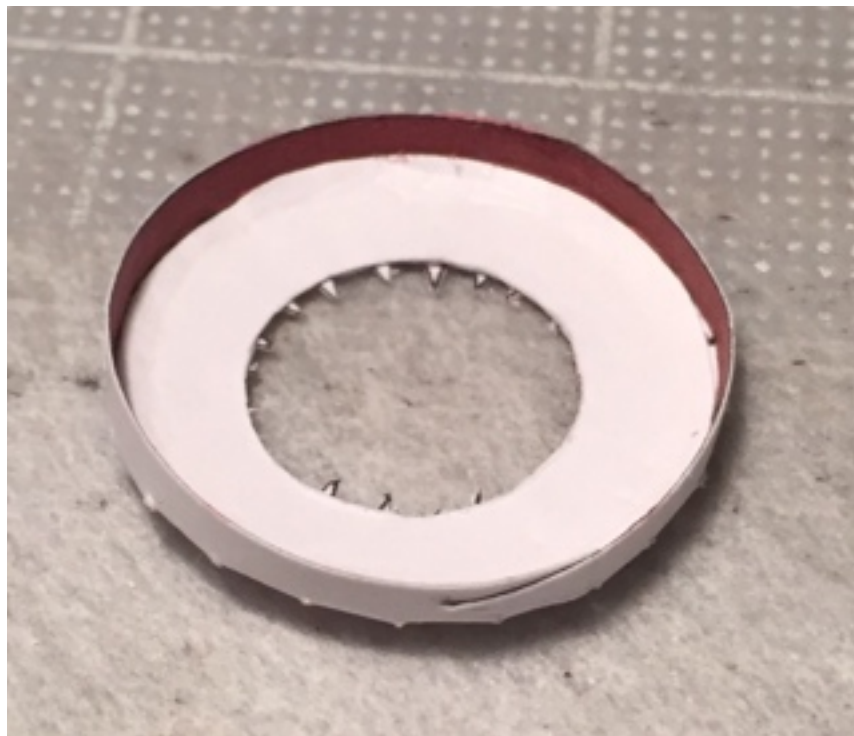

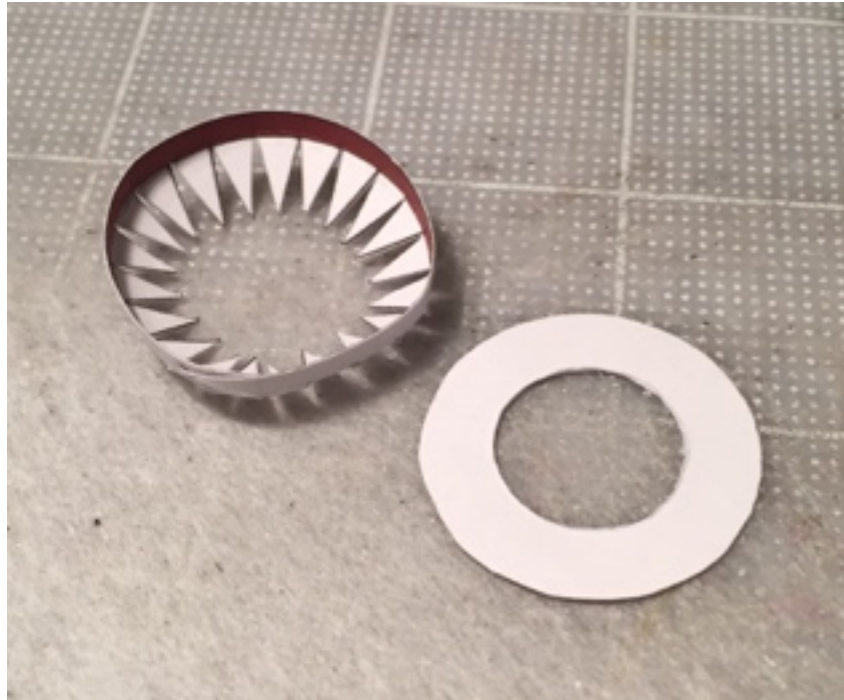

Cutting out the SRB attachment points

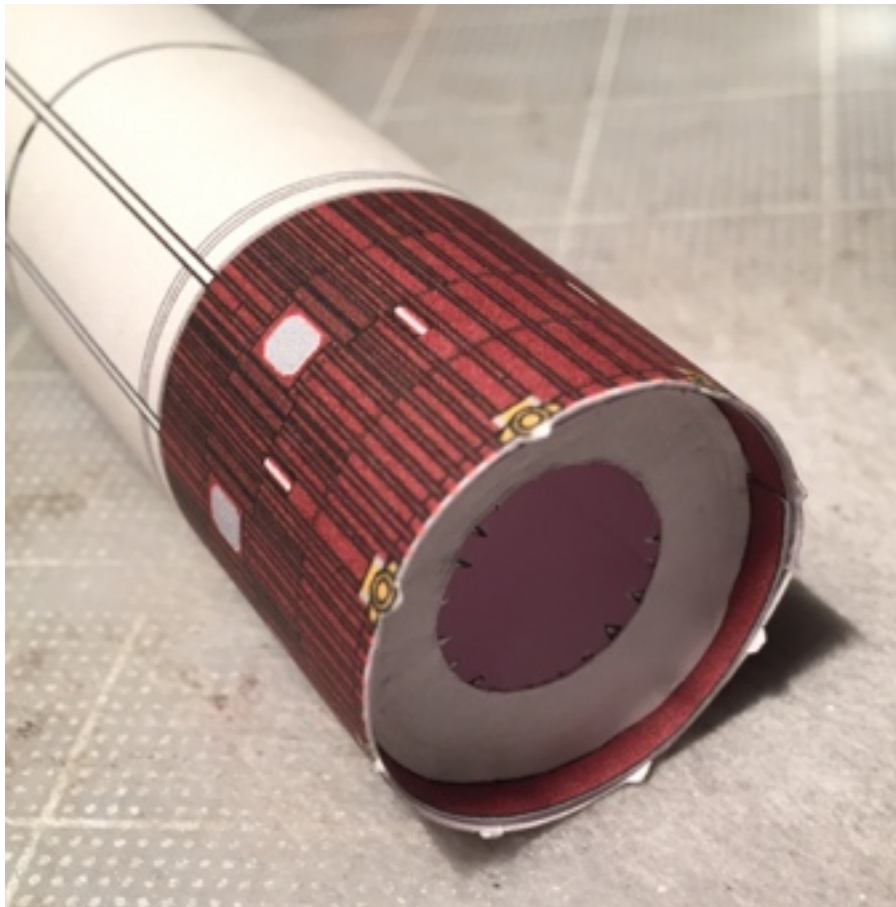

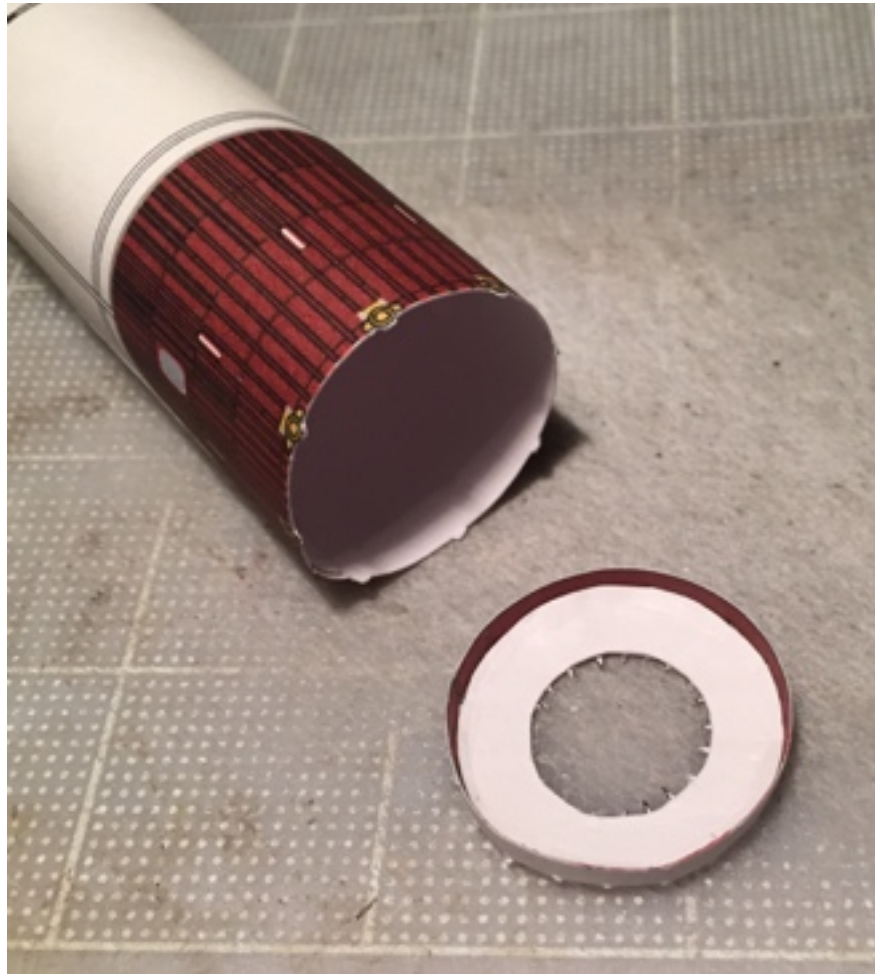

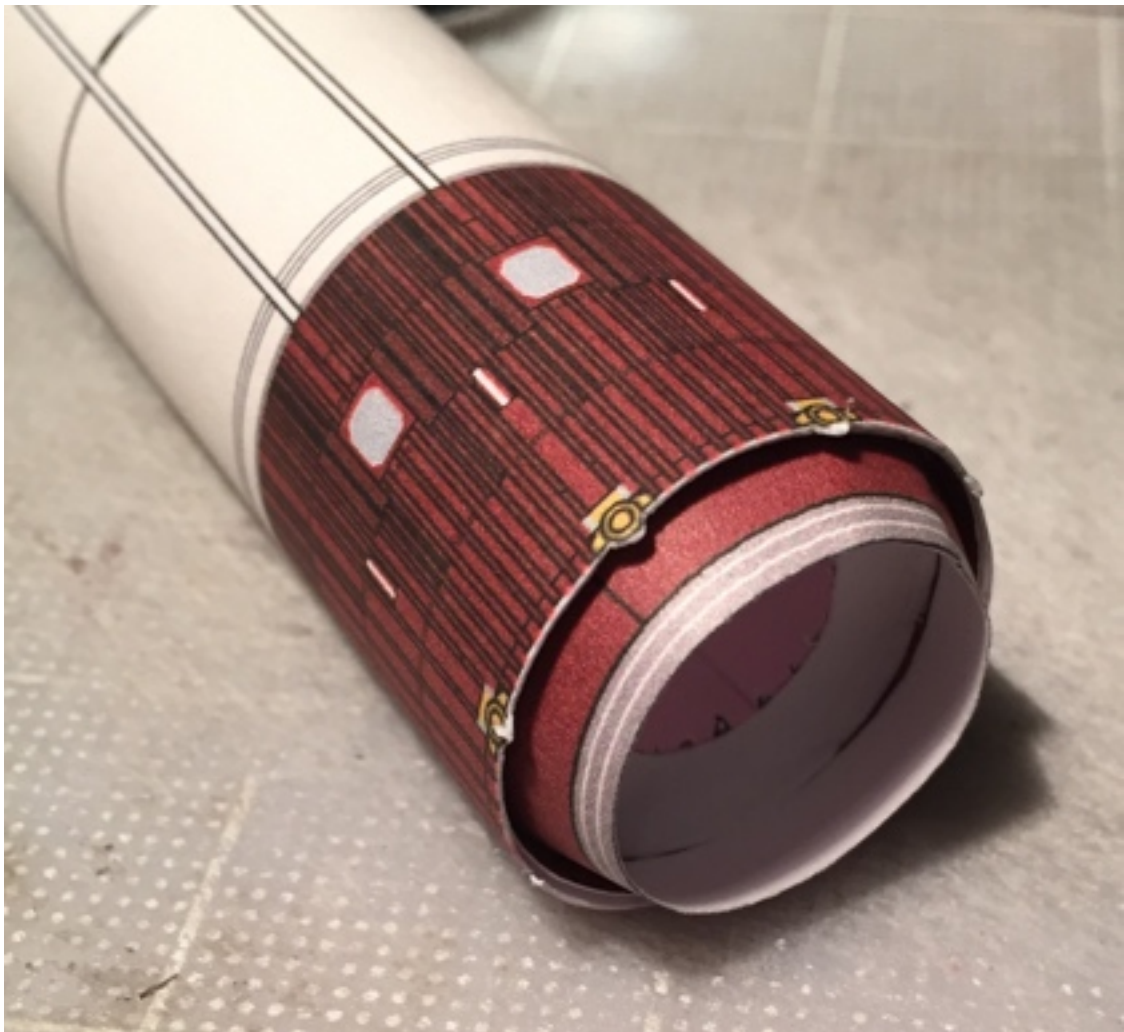

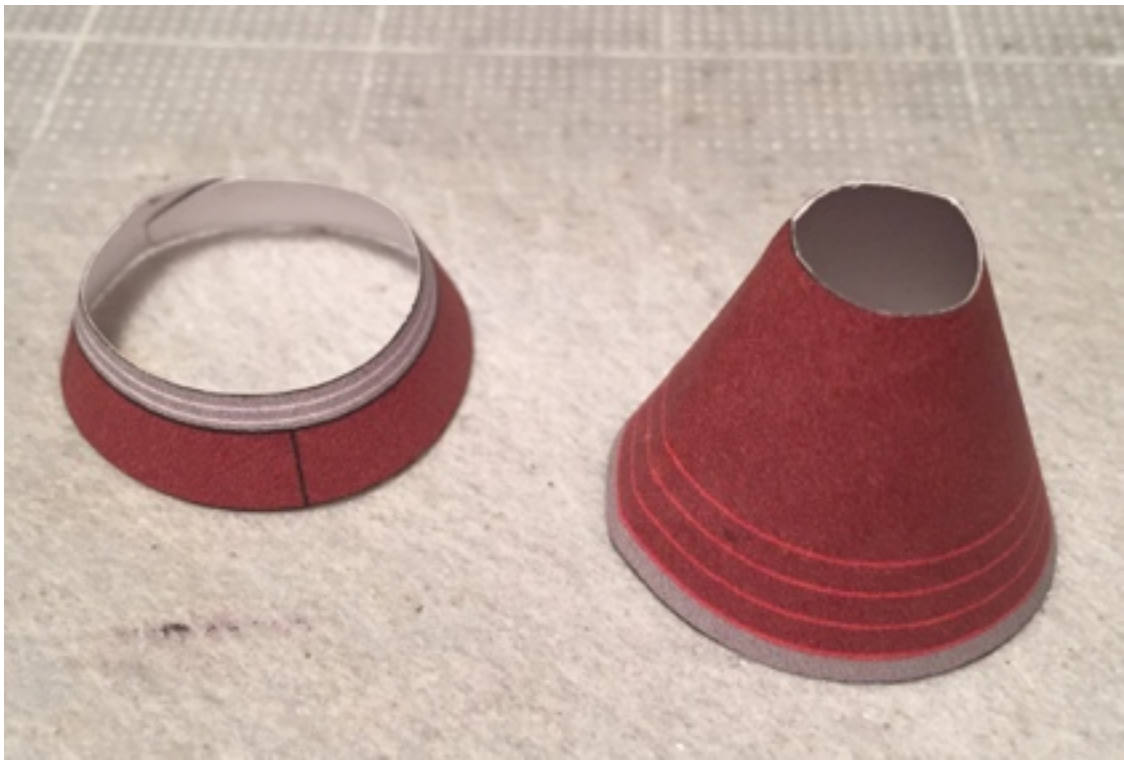

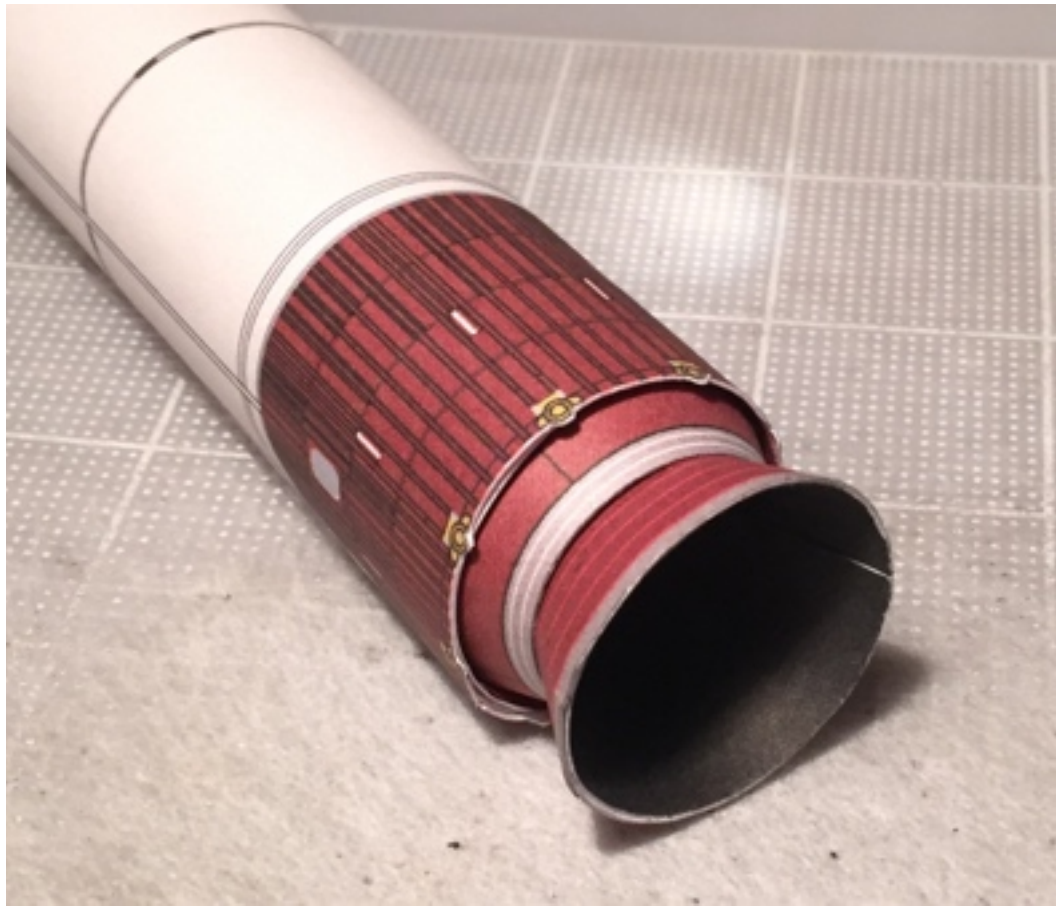

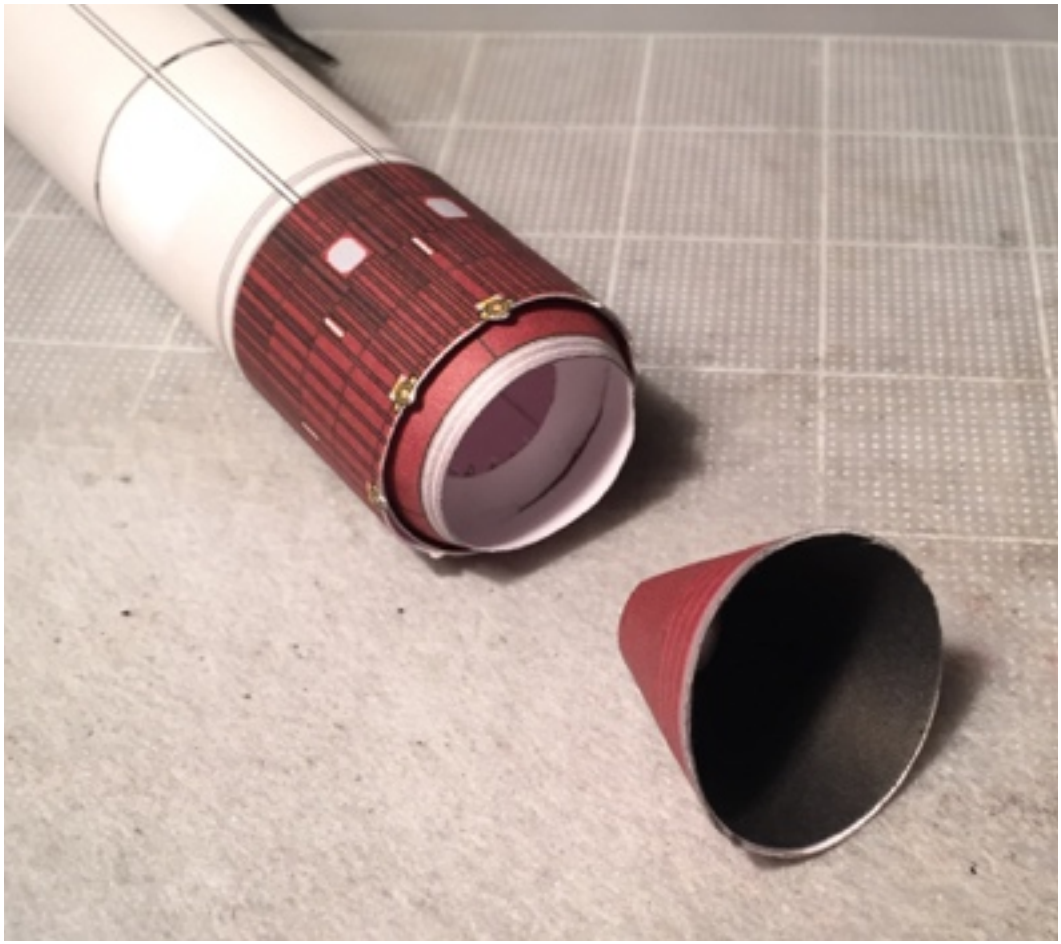

Adding the engine

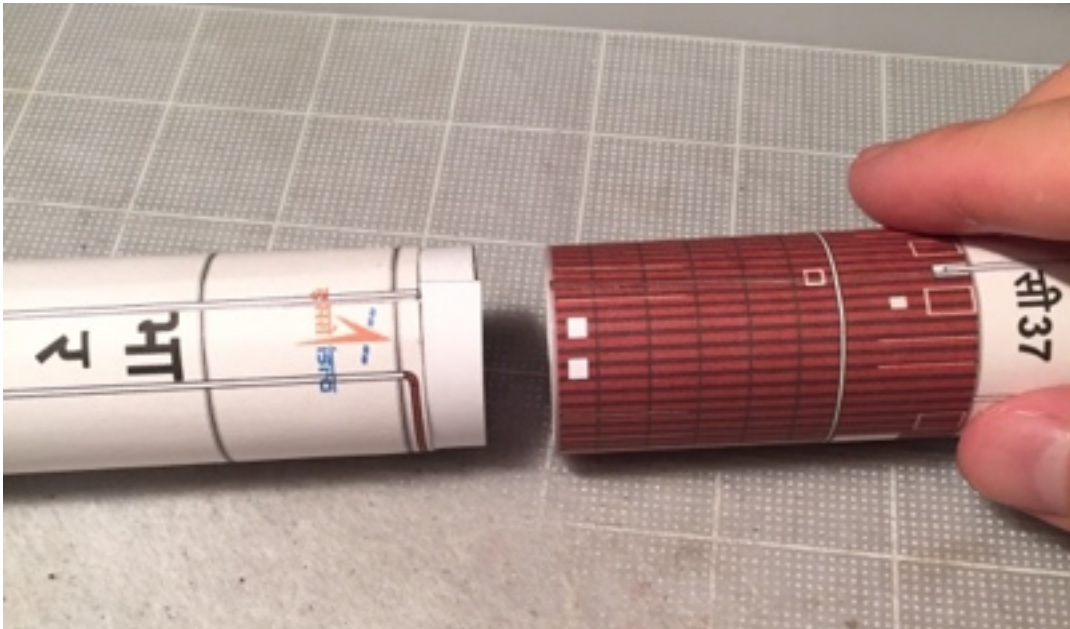

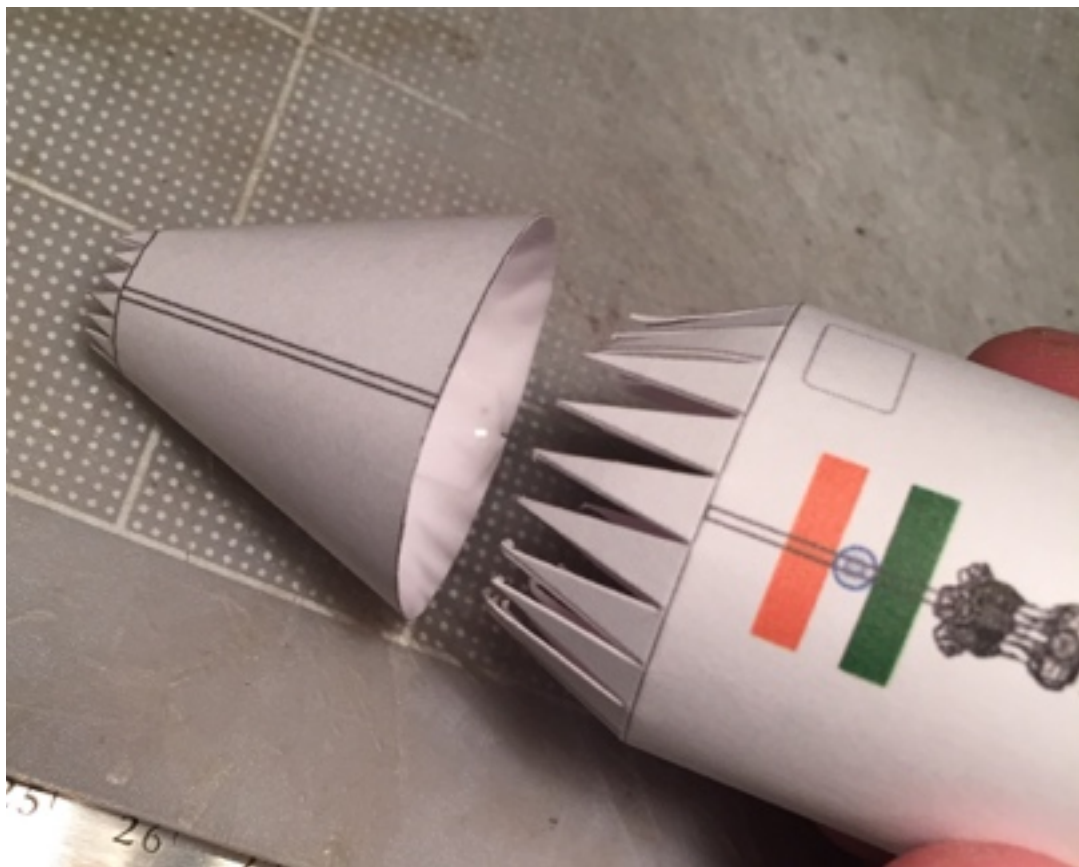

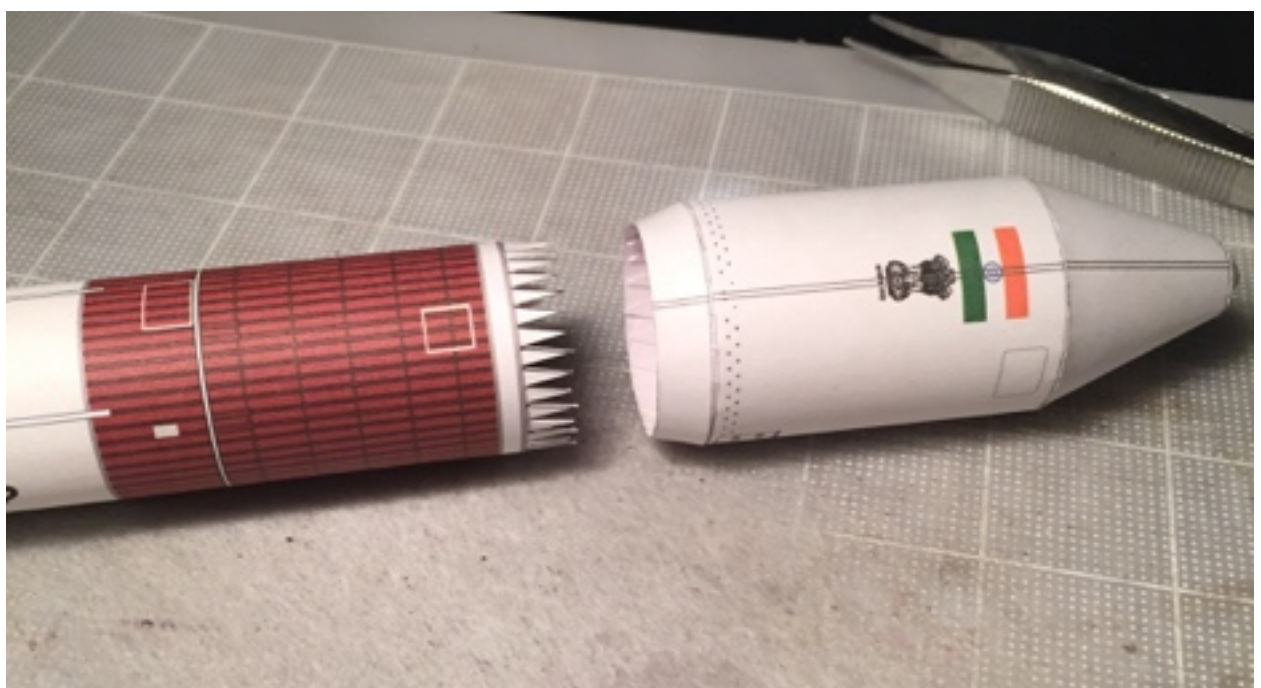

Adding the stages and fairing

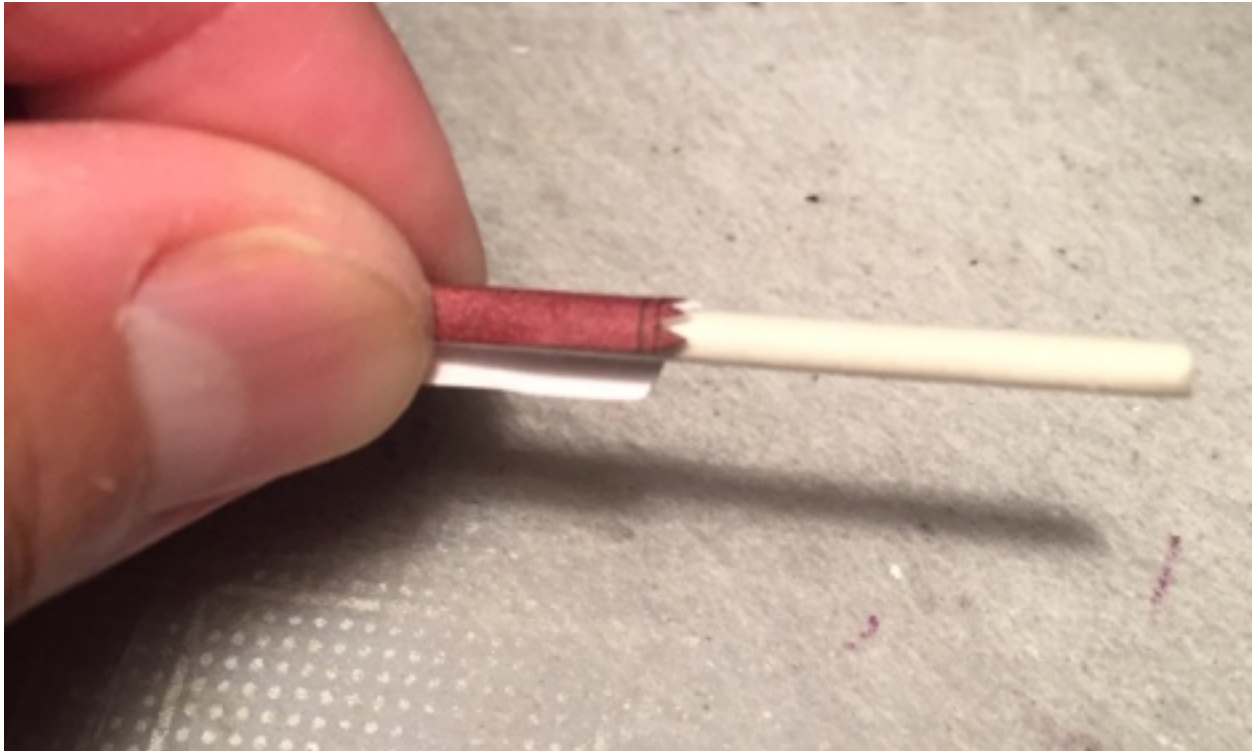

Second stage tanks and reaction control motors

Hot gas reaction control motors (roll control)

Use a thin rod or paper clip to roll these tiny nozzle pieces.
With the aid of a very small tweezer these pieces can be rolled up.

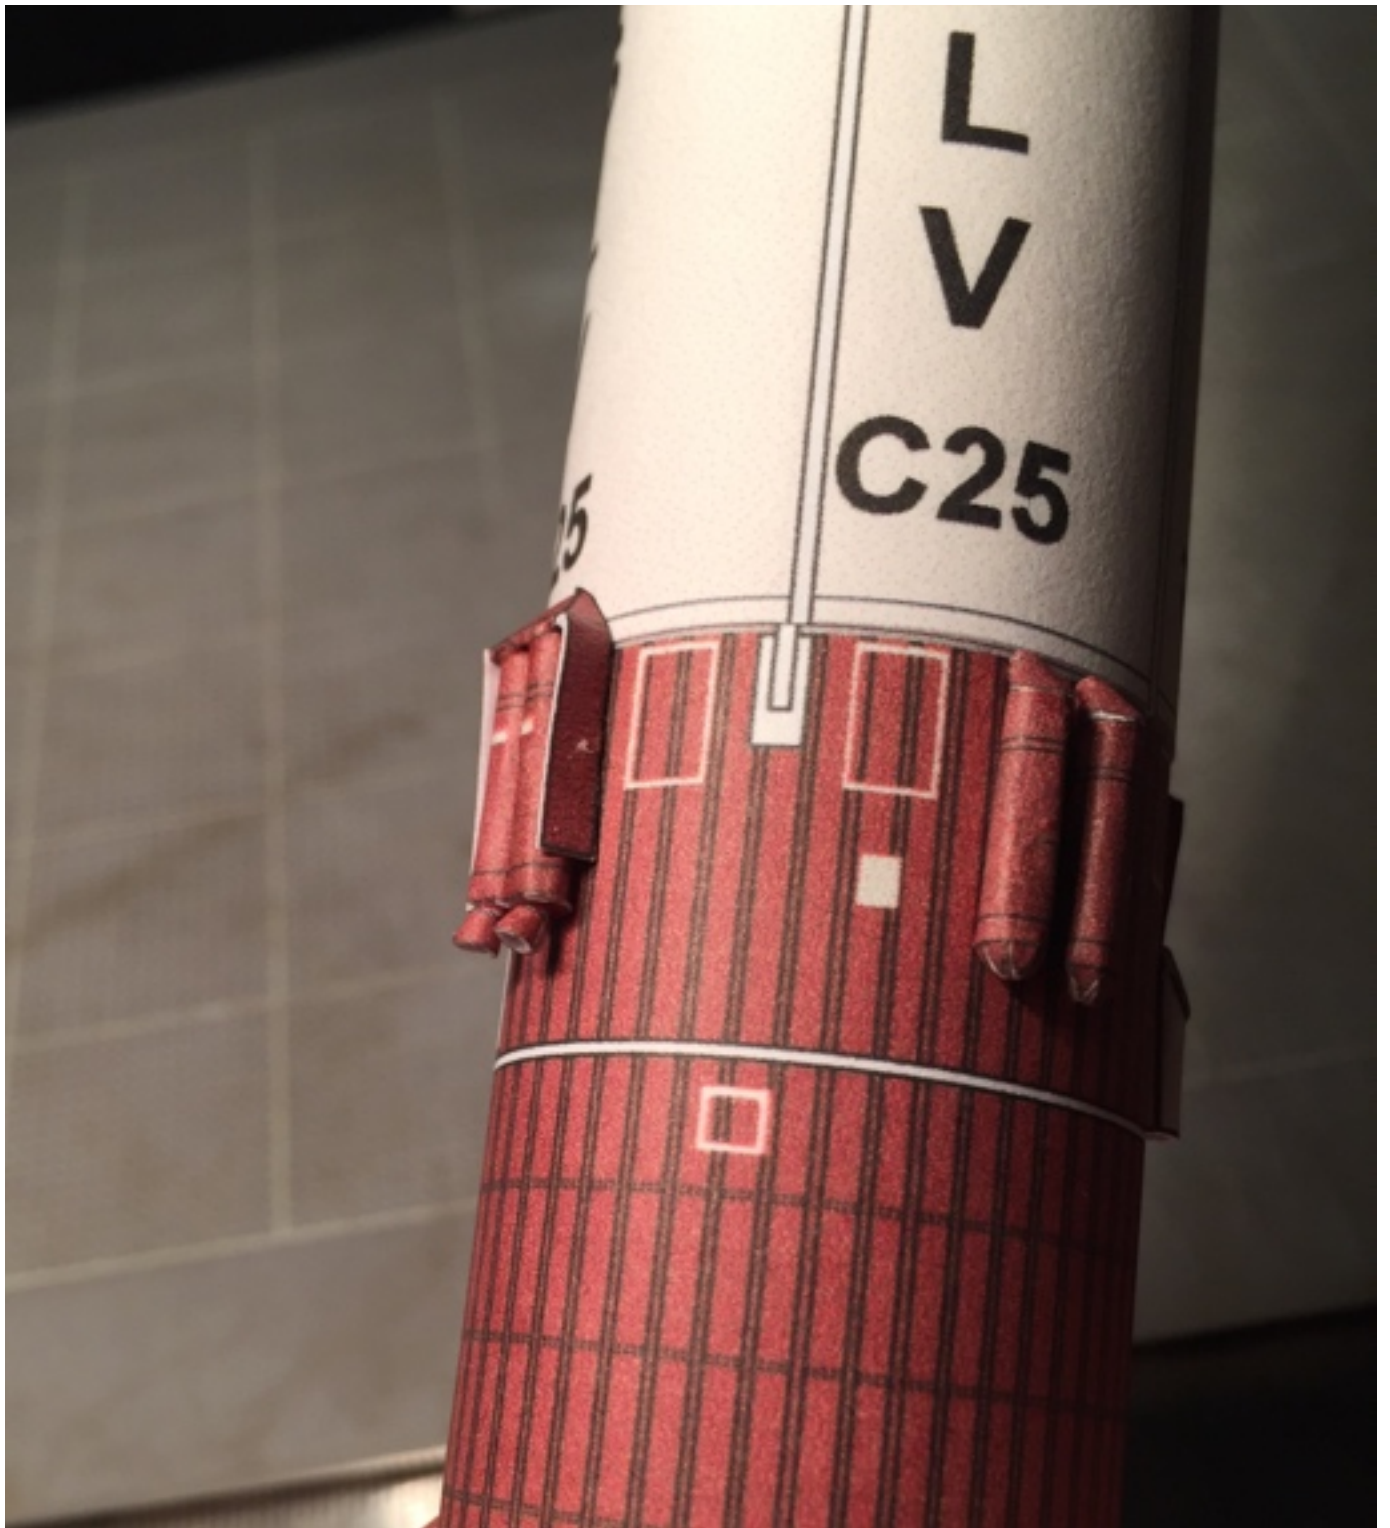

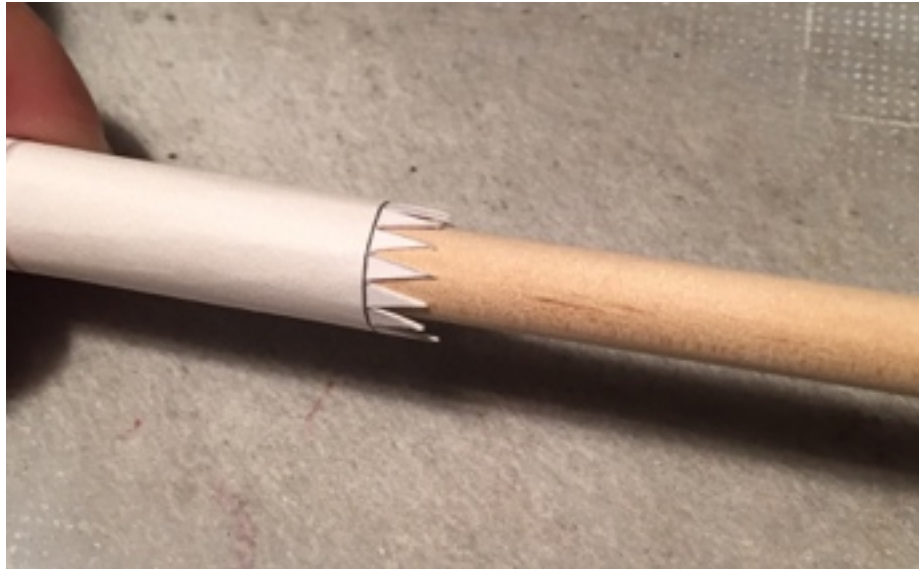

There are two sets of Hot Gas Roll Control Motors. These are placed next to the 2 big white rectangular areas on the second stage.

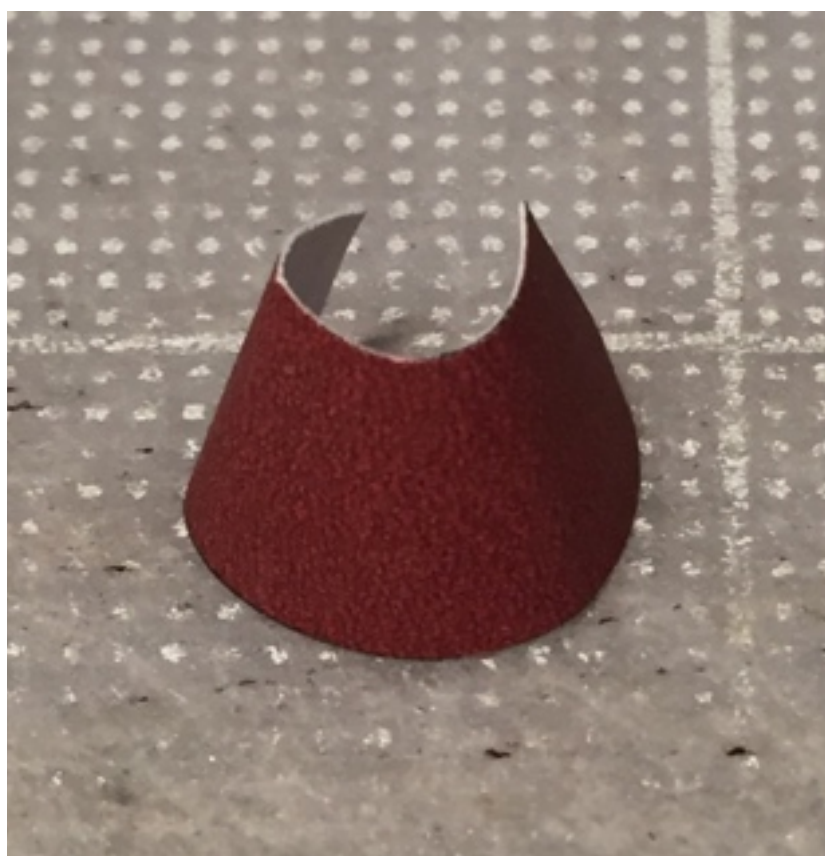

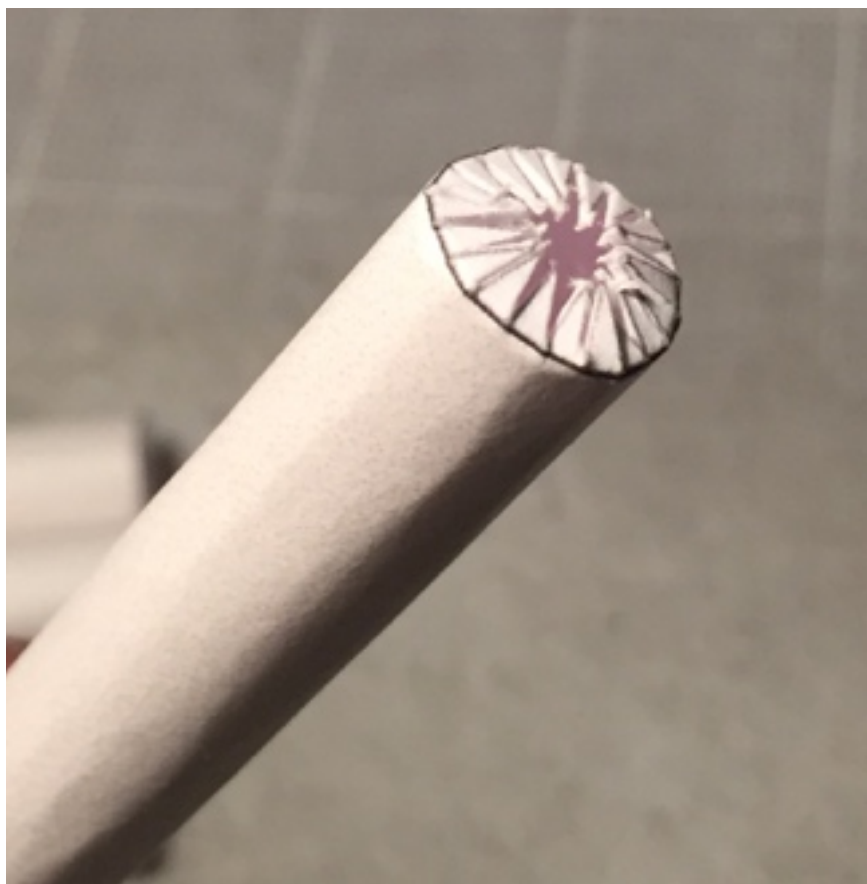

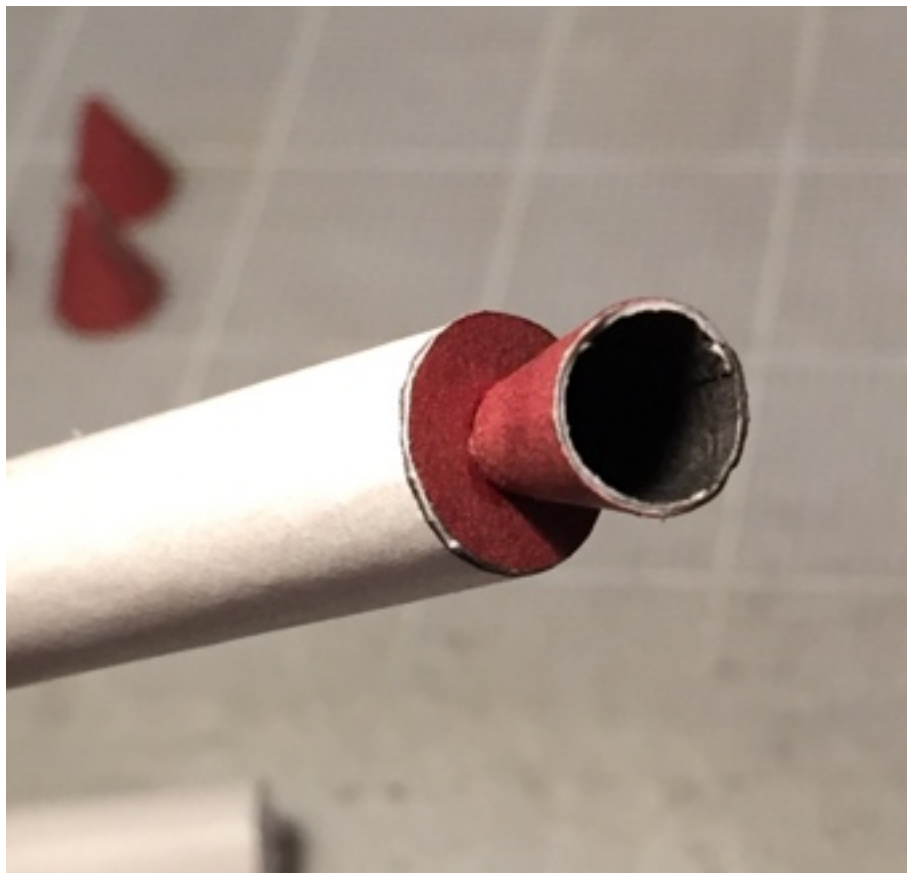

Assembly of the Strap-on Solid boosters
