NOT TO SCALE

Building the Dragon capsule

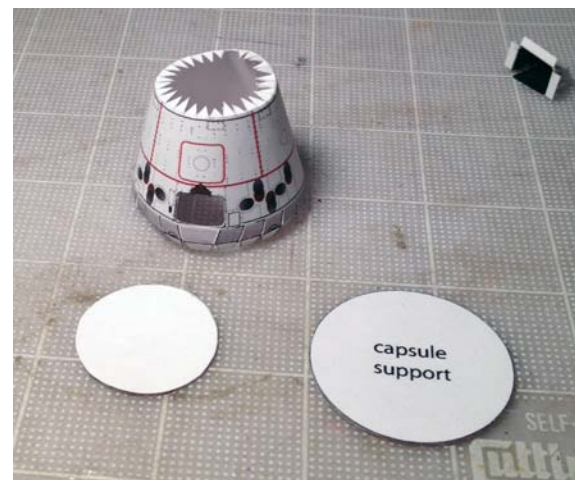

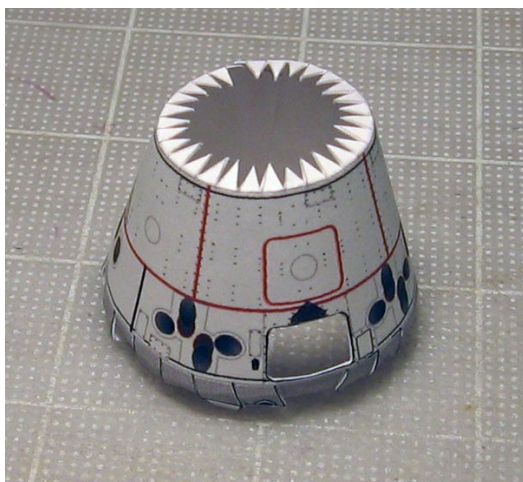

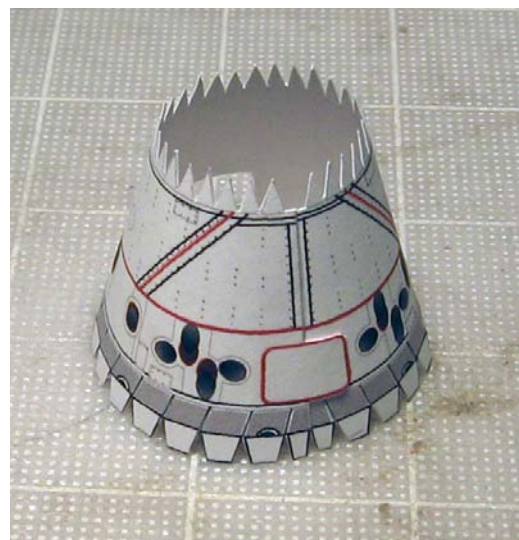

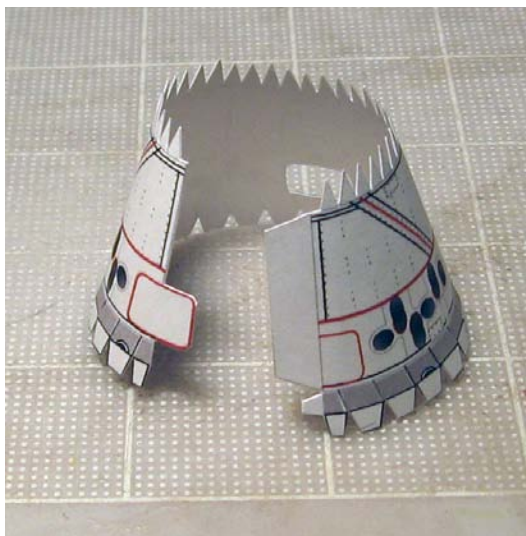

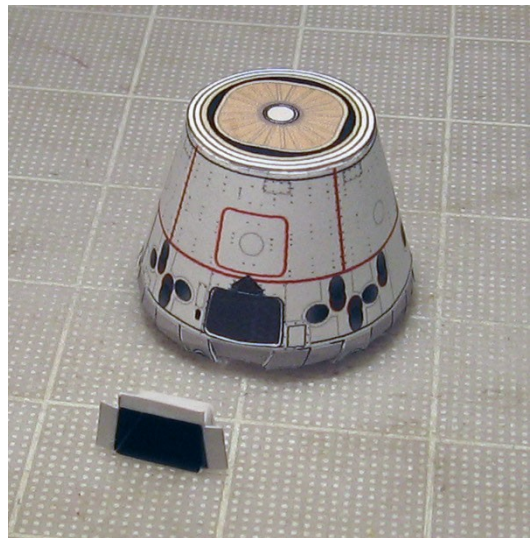

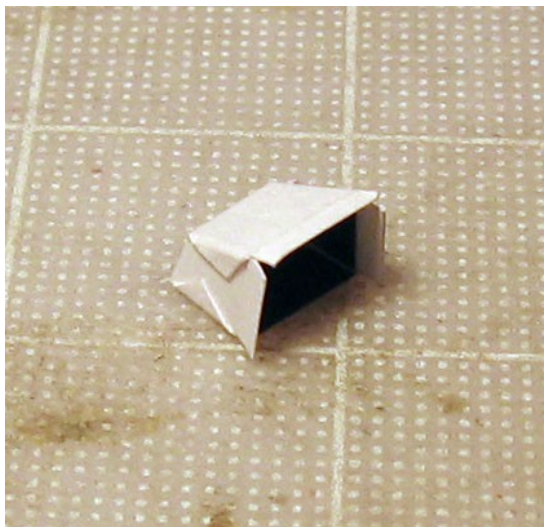

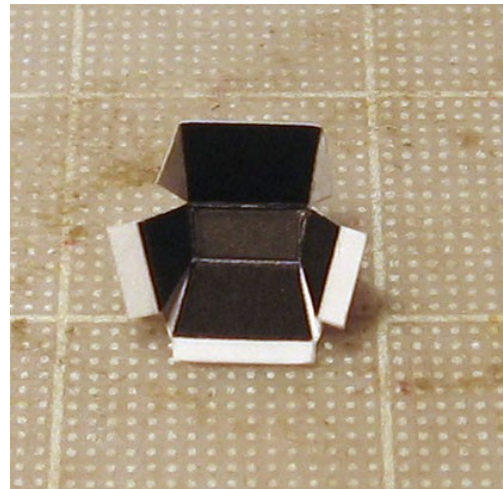

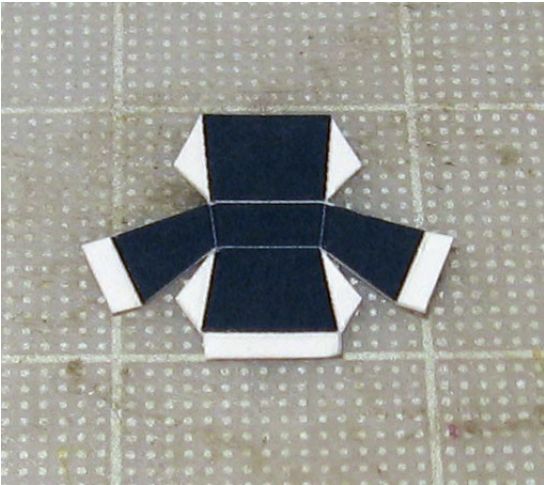

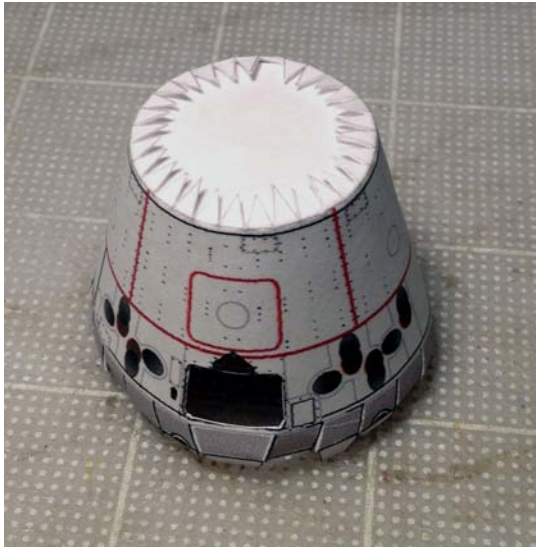

There are 2 versions of the Dragon capsule, one to be displayed on top of the Falcon-9 rocket and the other as in orbital configuration with open hatch.

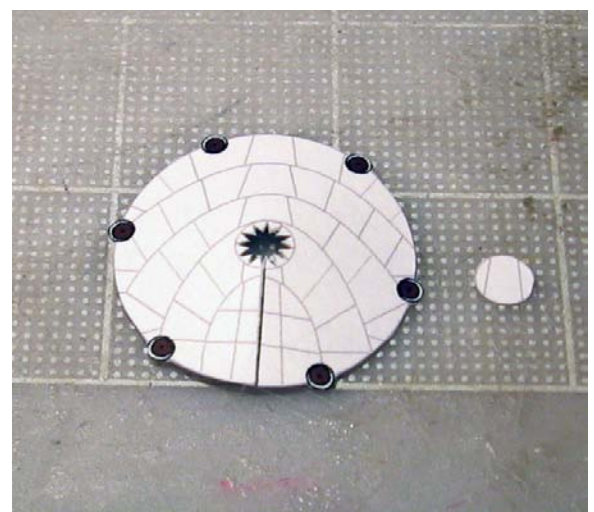

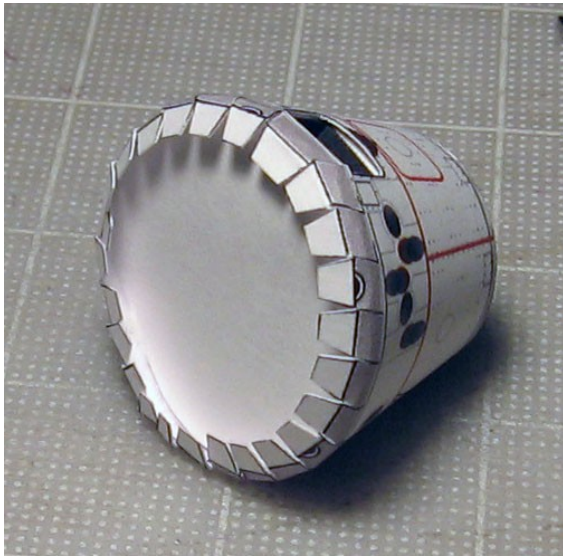

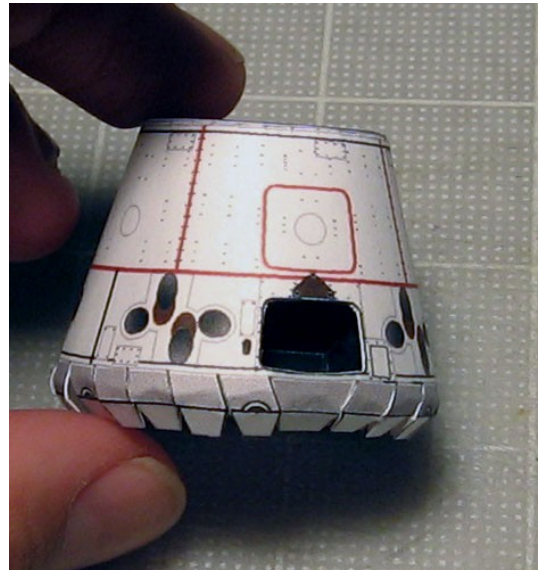

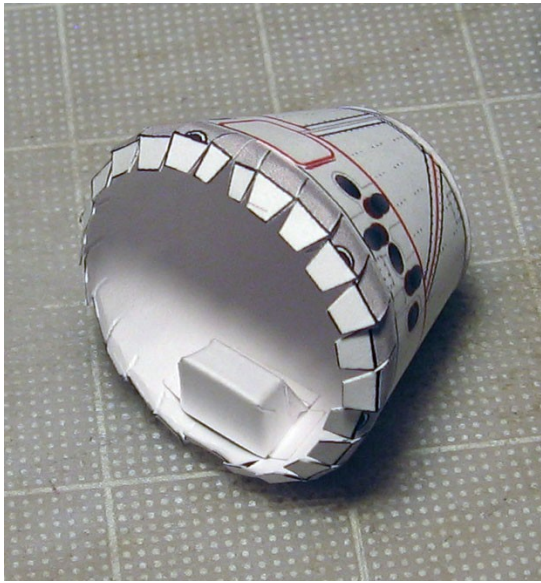

This photo shows the open hatch capsule.

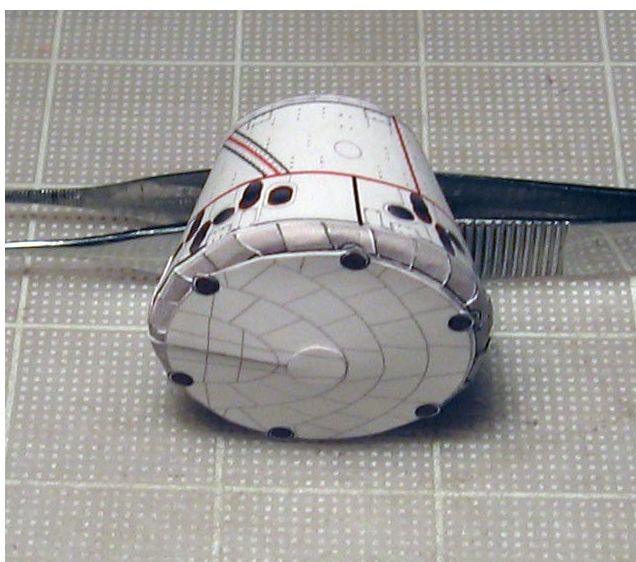

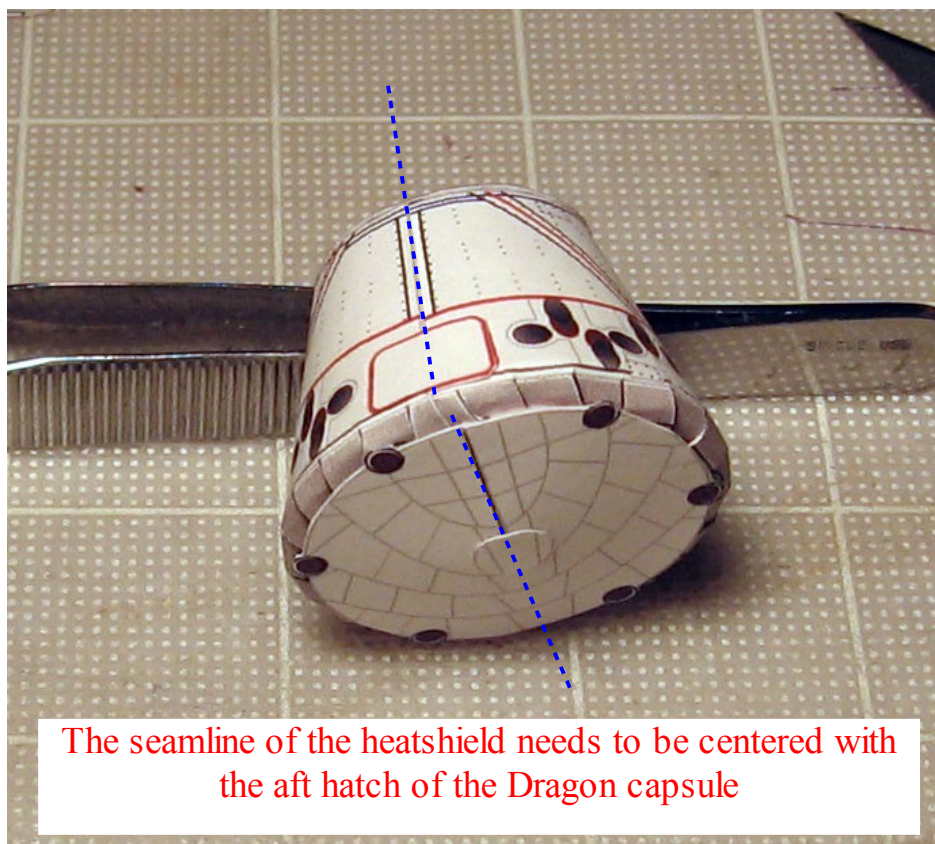

The assembly for both versions is the same.

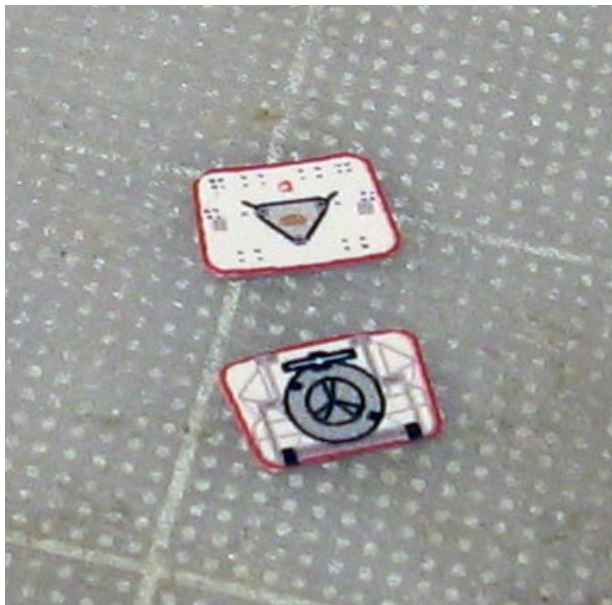

The gray area needs to be curved before assembling the capsule. (arrow)

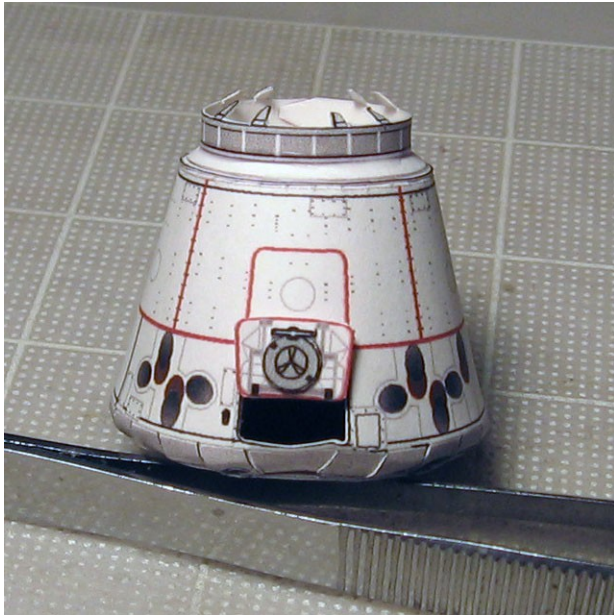

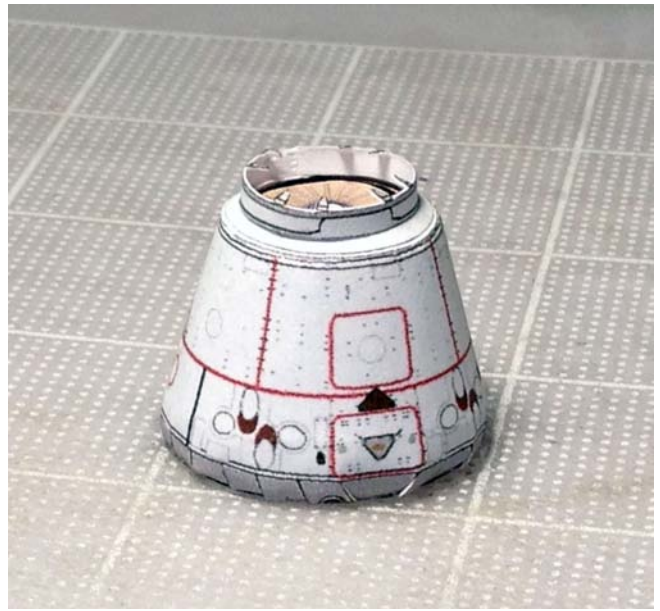

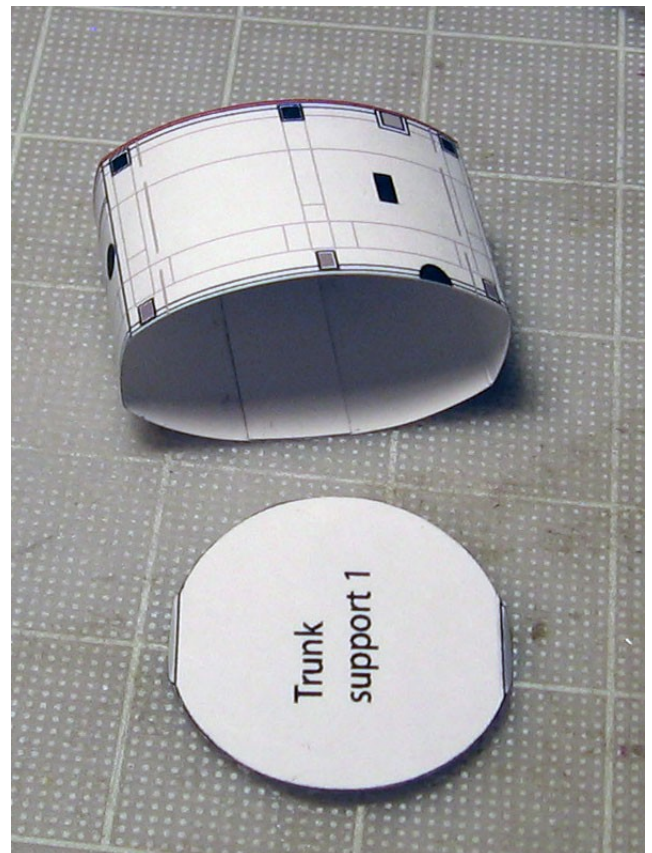

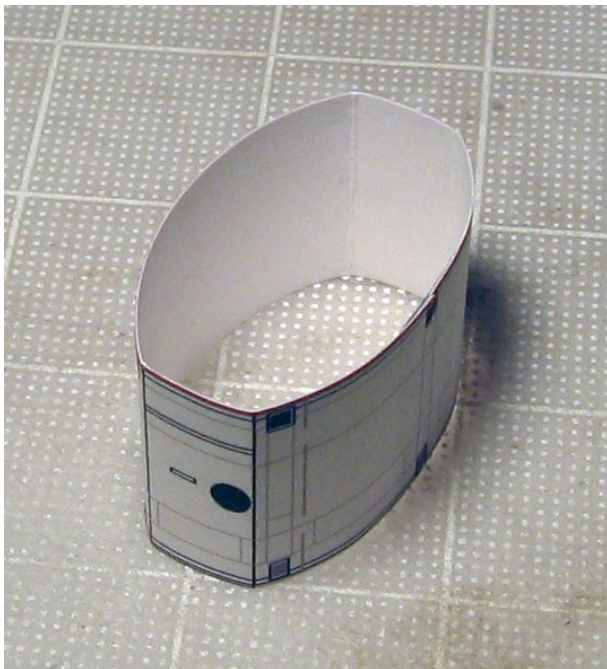

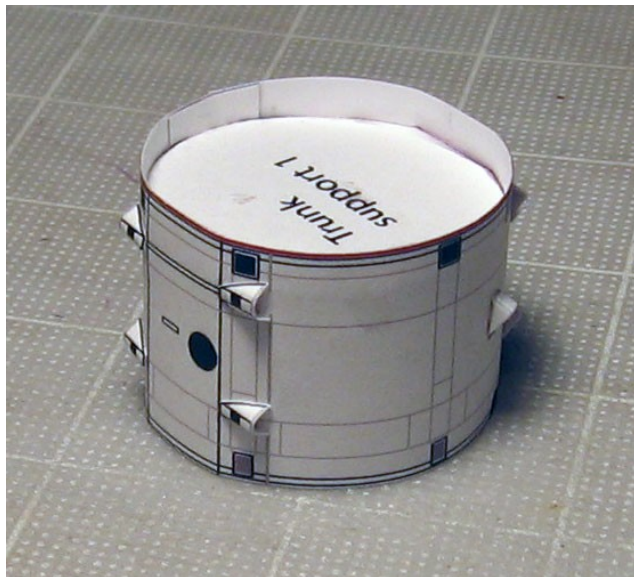

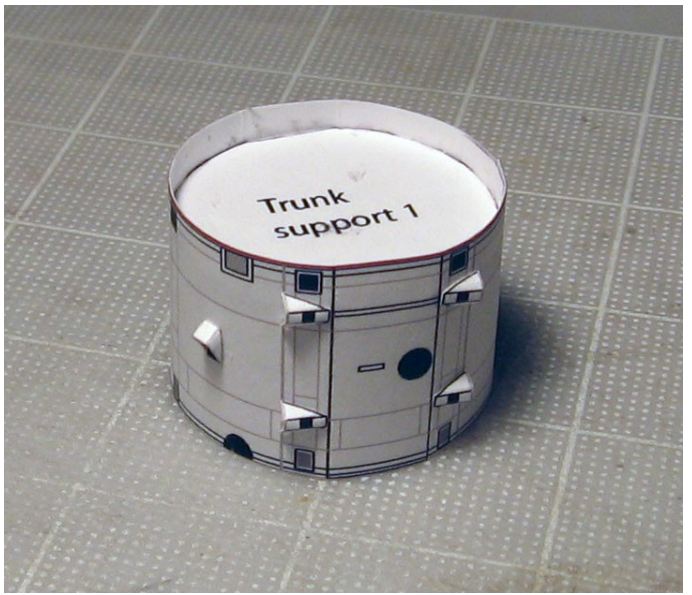

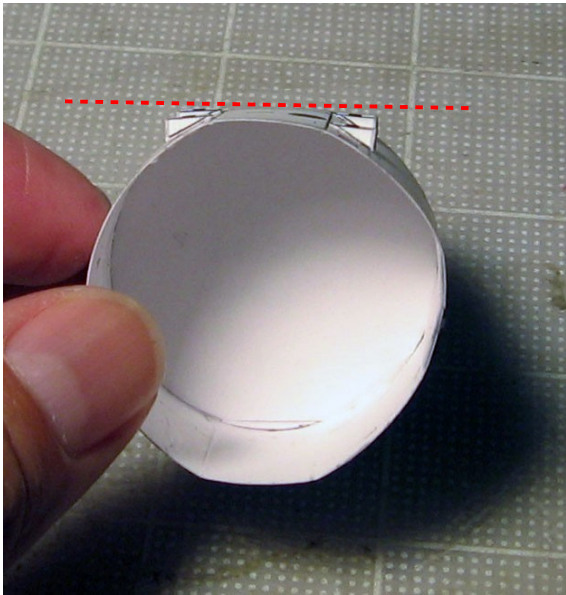

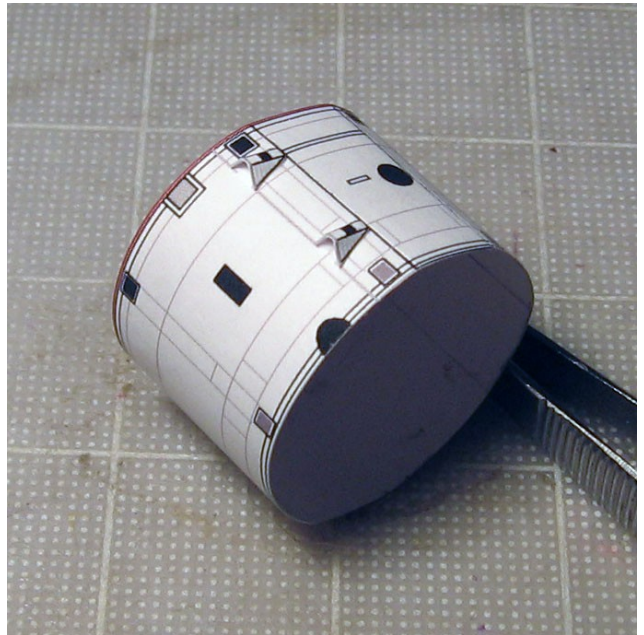

Dragon capsule with open forward hatch in orbital configuration.

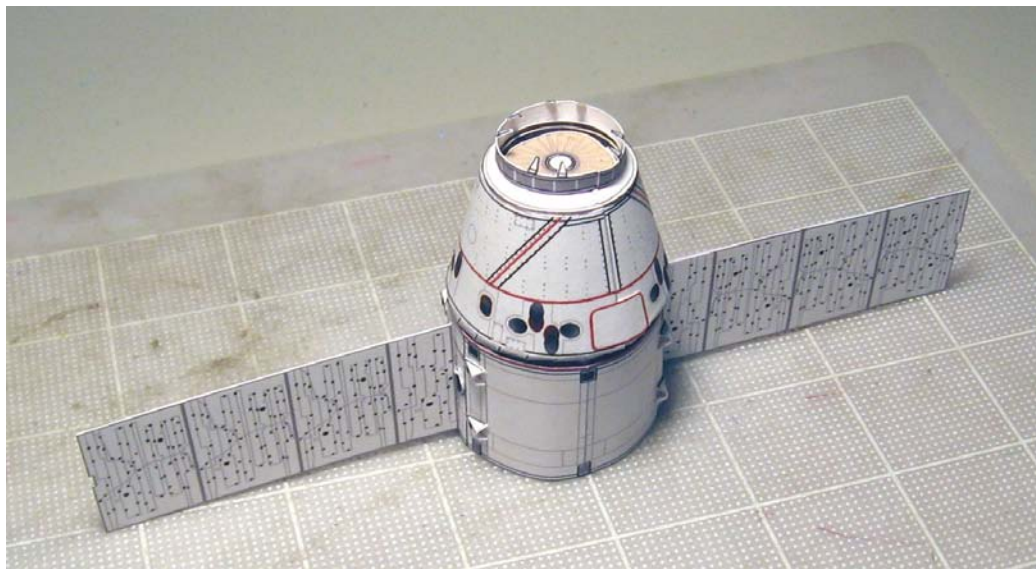

Simple Dragon capsule version to be displayed atop of the Falcon-9 rocket.
