Remote Manipulator Arm and Orbiter Boom Sensor System arm

1:144 Scale

The Remote Manipulator Arm will not be articulated. It's a single piece. You can use a cotton swab because it matches the thickness of the Arm for this scale. (2.0 mm) Remove the cotton and cover the swab with this paper part. You will need another swab to complete the length of the Remote Manipulator Arm. You can be creative by using any other material for the Arm.
