Antenna

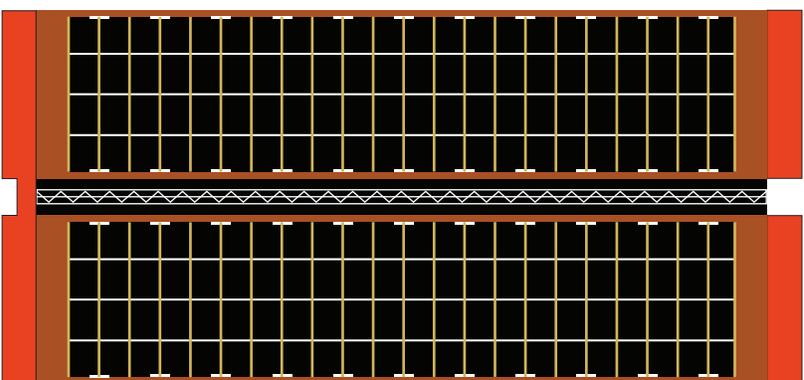

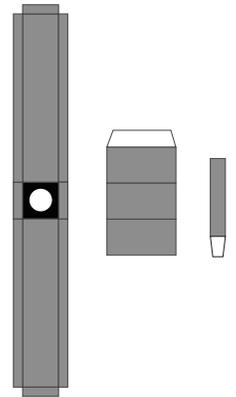

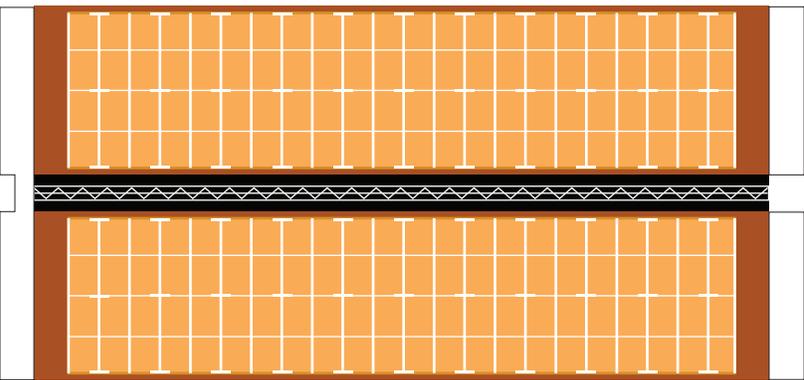

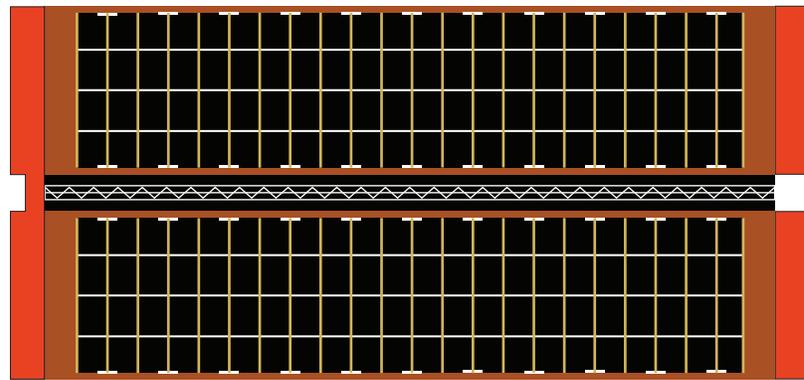

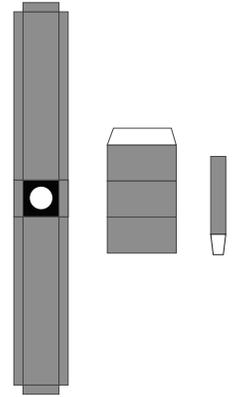

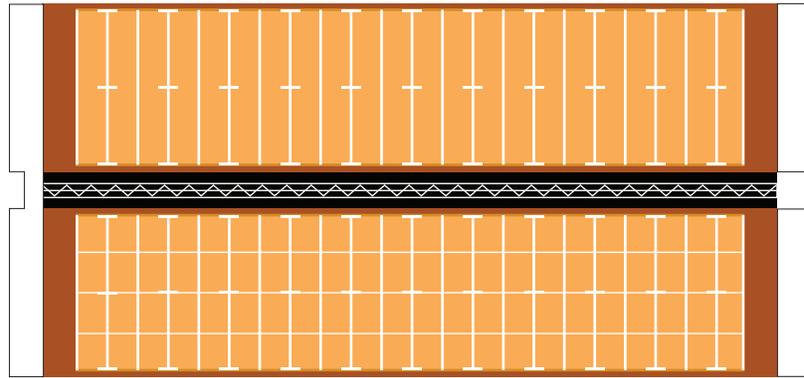

Cut a cottonswab (31 mm of length and 2 mm of width) and use as a connector for the stowed solar panels

# TIANHE module solar panels

Print on Cardstock (90 lbs)

1:100 Scale

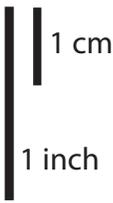

Cut a cottonswab (71 mm of length and 2 mm of width) and use as a connector for deployed solar panels

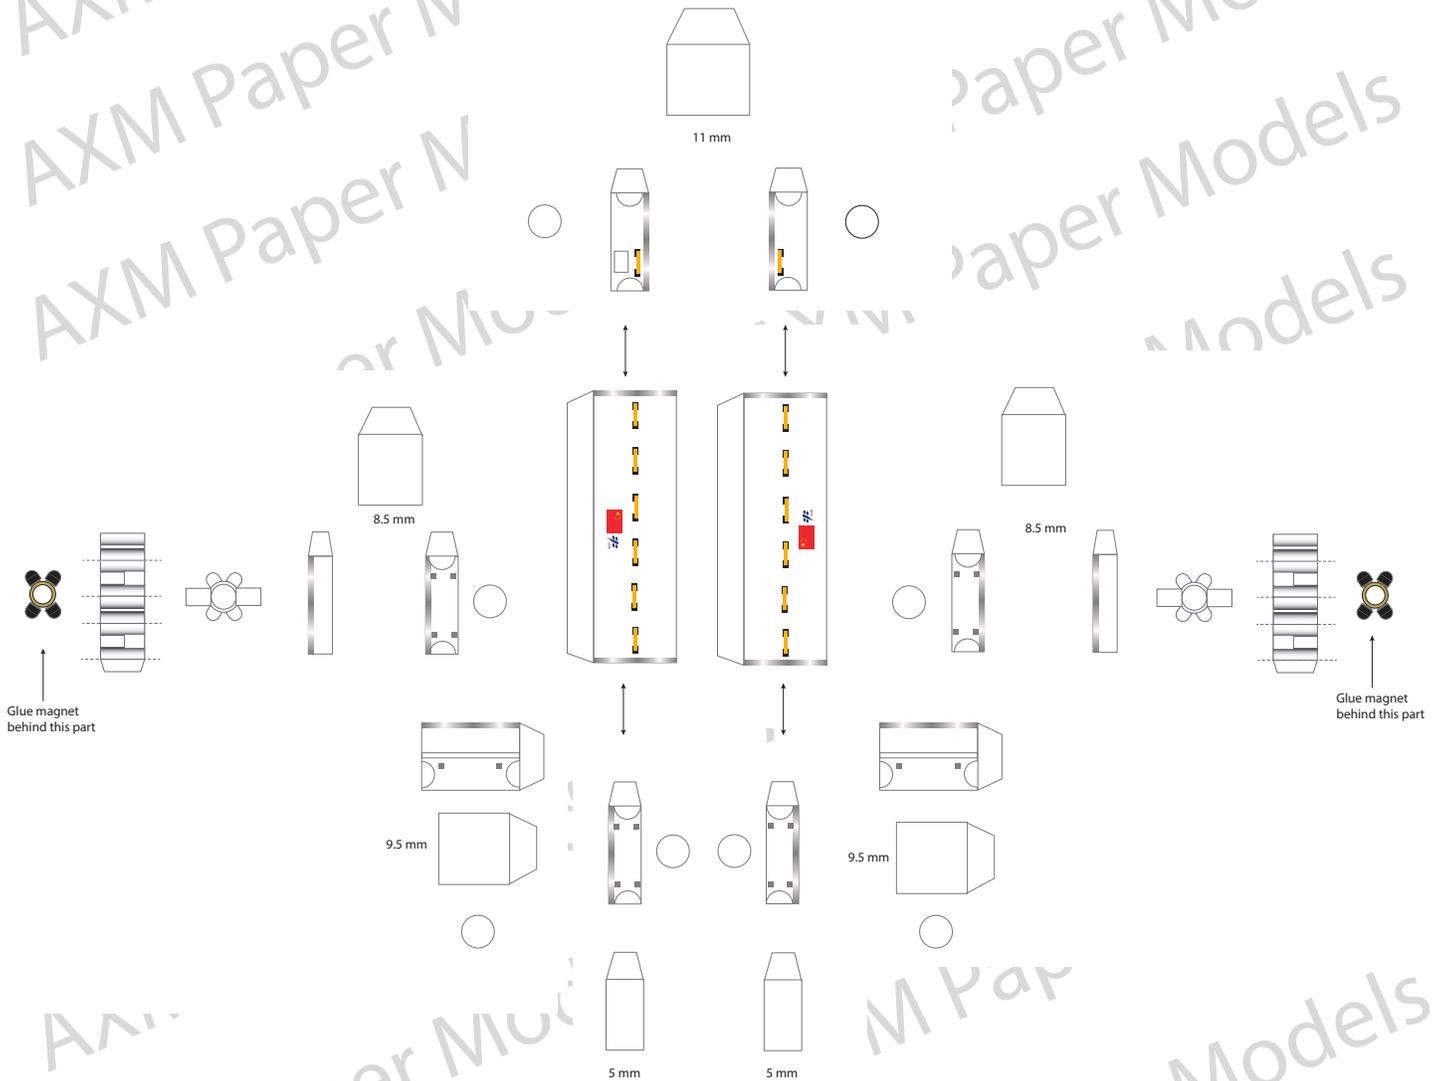

# Tianhe's robotic Arm

Print on Cardstock (90 lbs)

1:100 Scale

Depending on the thickness of the cardstock used, it's necessary to layer the rods with plain paper in order to create a snug fit. If 90 lb paper is used, then create an extra layer over the rods.

If 110 lb paper is used, it might not be necessary to create an extra layer or paper over the rods.

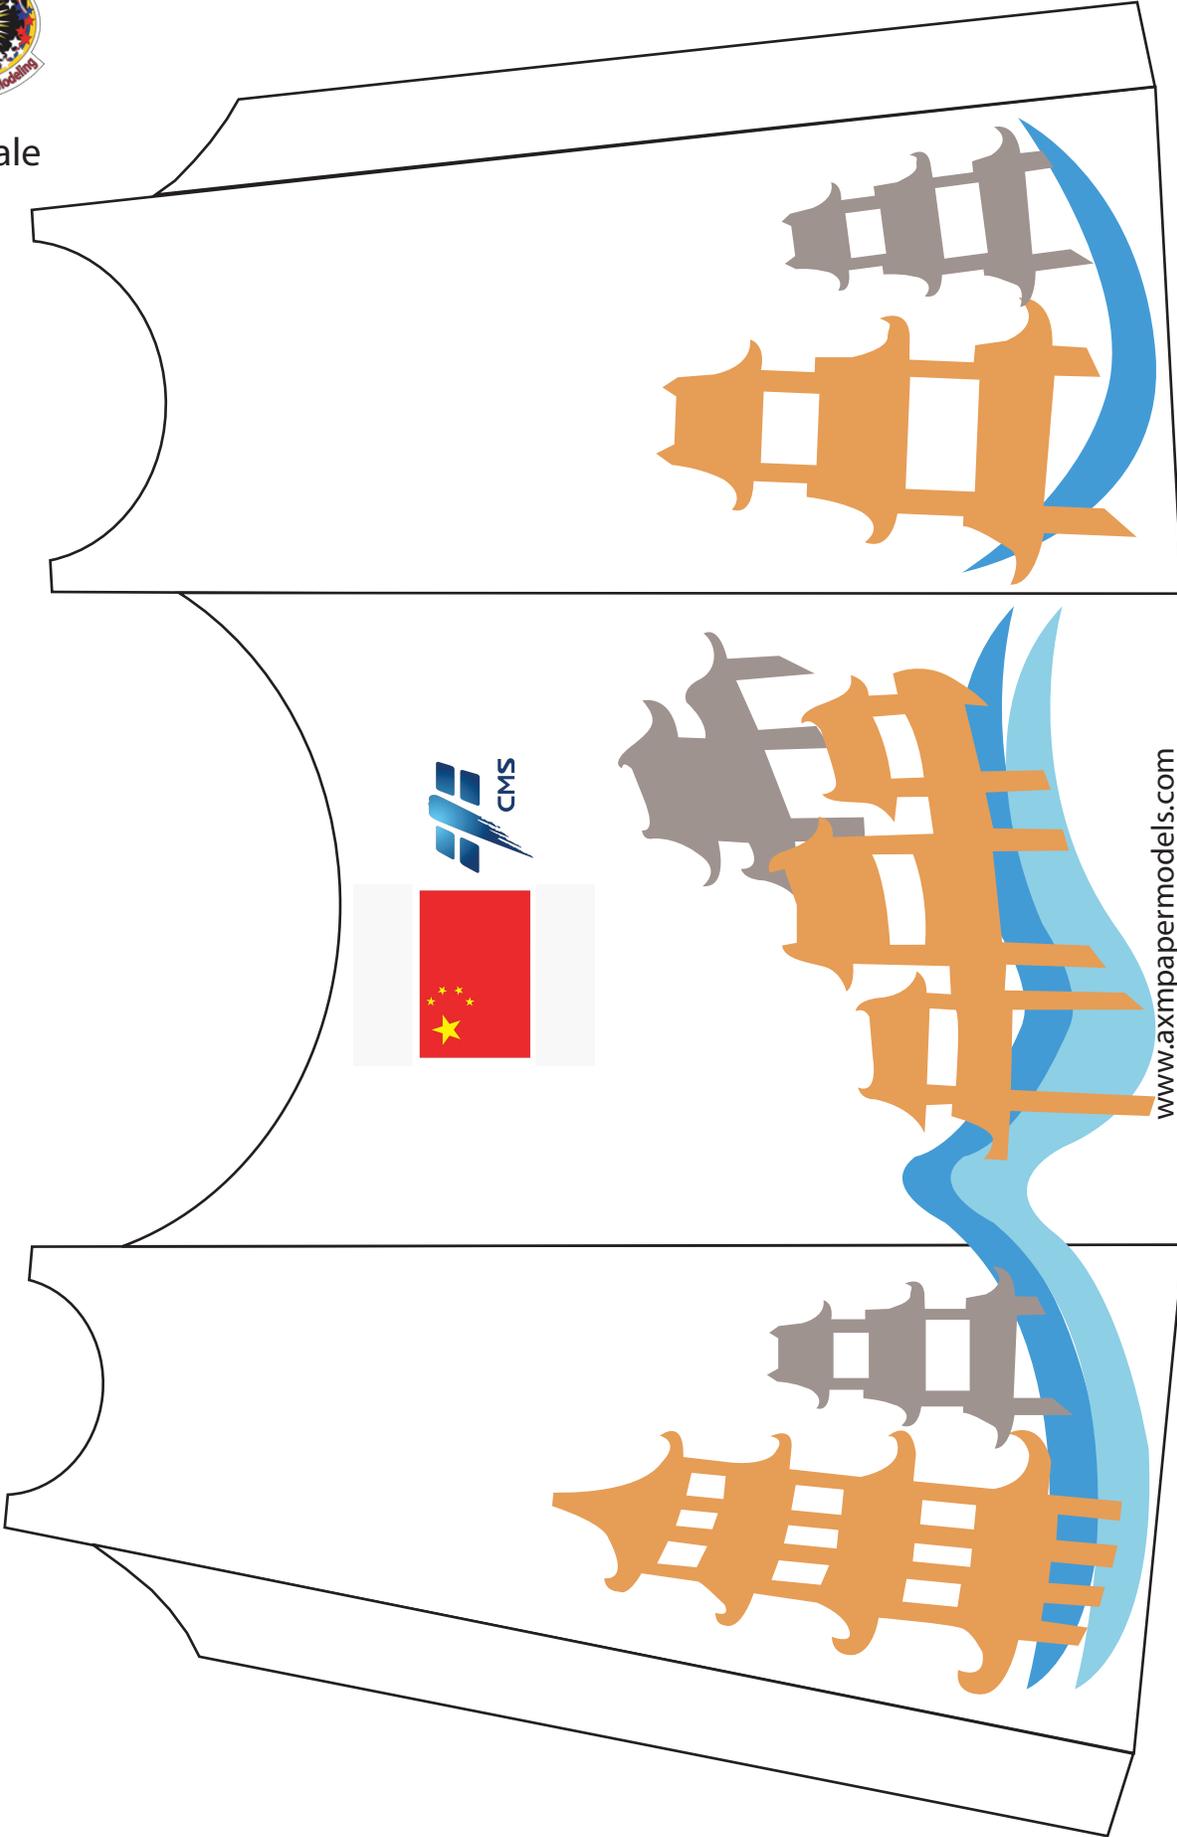

The parts with dimensions are the rods.
